

Style Guidelines for CVWW 2008 Papers

Abstract This document gives a specification for the paper layout for submission to the Computer Vision Winter Workshop 2008. Additionally, some guidelines for preparing the papers using \LaTeX are given. This document is written in accordance to the specification and guidelines, and hence may be used as an example of how a paper should look like.

The Proceedings and the CD-ROM of the annual *Computer Vision Winter Workshop* are produced from camera-ready electronic copy of the papers prepared by the authors.

To maintain some uniformity of appearance, authors are required to make their “camera-ready” copy appear as similar as possible to the template documents supplied below, as they are prepared strictly in accordance with the desired layout. Papers must not be longer than 8 pages, including all figures, references, appendices etc.

Papers should be submitted as PDF files. Printed hard-copy papers will not be accepted. Authors who prepare their papers using \LaTeX [2] should use the `CMPPProc` class file, `cmpproc.sty` from the Center for Machine Perception, CVUT FEL, Prague Czech University of Technology. You probably already have `cmpproc.sty` class file – it is the part of the same archive as `sample.tex` file you are currently reading or editing. Microsoft Word format (*.doc) papers will not be acceptable.

Further details on how to use this style file are given in Section 2.

1 Introduction

1.1 Language

All manuscripts must be written in English.

1.2 Paper length

The paper must not be longer than 8 pages including all figures and references.

1.3 The ruler

The \LaTeX style defines a printed ruler which should be present in the version submitted for review. The ruler is provided in order that reviewer may comment on particular lines in the paper. In the camera ready paper the ruler must be removed (see Sec. 2.1 for more details).

Country	Gold	Silver	Bronze	Total
Austria	51	64	70	185
Czech Republic	5	13	17	35
Slovenia	0	0	4	4

Table 1: Detailed medal count for Winter Olympic Games from 1924 to 2006.

1.4 Page numbers

There should be no page numbering in the parts of the paper that will appear in the Proceedings, page numbers will be added by the editor.

1.5 Equations

Equations should be centered and numbered like this:

$$\Gamma_n(z) = \int_0^\infty t^{z-1} \exp(-t) dt. \quad (1)$$

1.6 Figures and Tables

Figures (such as Fig. 1) and tables (such as Tab. 1) should be numbered separately within the page¹. All figures and tables must be given a caption, which should appear below the display. Captions should be centered below the display.

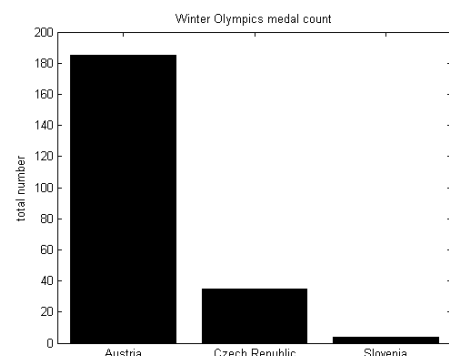

Figure 1: Total medal count for Winter Olympic Games from 1924 to 2006.

1.7 Color

Color is valuable, and will be visible to readers of the electronic copy. However ensure that, when printed on a
